Arnav Ahuja

(+91)9667005300 — arnavahuja21@gmail.com — linkedin.com/in/arnav-ahuja/ — arnavahuja.github.io/

Education

- **Birla Institute Of Technology and Science, Pilani, Rajasthan, India** *2018-2023*
  Bachelor of Technology Computer Science
  Master of Science in Mathematics (Dual Degree)
  Overall CGPA: 8.29/10
- **St Xavier's School, Jaipur, Rajasthan, India** *2017-2018*
  All India Senior School Certificate Examination (Class XII)
  Percentage: 95.6%

Work Experience

Messaging Service Framework ***Barclays***
Position: Graduate Developer — Team: Consumer Credit Risk *Aug'23 - Present*

- Curated consumer credit risk based **model-ready datasets** for multiple teams within Barclays
- Spearheaded the **design and implementation of a unified messaging service**, integrating diverse team services.
- Utilized **multiple AWS services to migrate team processes to the cloud**, enhancing operational efficiency

Western Australia Transforming Community Health ***WA Health***
Guide: Dr. Seshadri Vasan, Director of Research at WA Health *Jan-May'22*

- Analyzed ∼**19000 attributes for 373 suburbs** in the Australian continent for improving community health
- Implemented **heirarchical clutering and PCA based clustering** for attribute correlation
- Obtained a specific suburb from the data for in-depth analysis and evaluation of policy effectiveness

Website Agnostic Crawler User Action Automation ***Amazon***
Position:Applied Scientist — Team:Selection Monitoring *June-Dec'22*

- **Analyzed web domain data** for competitor e-commerce websites.
- Utilized **AWS resources like Sagemaker, S3, Stepfunctions** to create baseline models for web domain data.
- Constructed a **Reinforcement Learning** and **Webpage Segmentation** based approach for user action automation in the web crawler.

Identifying Disease Using Machine Learning ***BITS Pilani***
Guide: Prof. Sundaresan Raman, Department of Computer Science *Jan-May'22*

- Analysed **single nucleotide polymorphism** data for identifying the susceptibility to **diabetic retinopathy**.
- Implemented **Lasso Regression and Random Forest algorithm for feature selection** in SNPs.
- Used **machine learning algorithms like kNN, SVM, Gradient Boosted DT** for predicting the susceptibility.

Virtual Hover Pen for Devanagari Script ***BITS Pilani***
Guide: Prof. Mukesh Kumar Rohil, Department of Computer Science *Aug-Sept'21*

- Created a virtual hover pen application with support for multiple user features using **openCV library**
- Integrated support for **hindi language recognition** of text written with hover pen
- Trained an encoder decoder model with **ResNet as encoder and LSTM decoder**

Crop Disease Identification ***BITS Pilani***
Guide: Prof. Jennifer Ranjani, Department of Computer Science *Jan-Dec'20*

- Developed a **new Inception Resnet deep learning architecture** to identify diseases in the leaf of tomato plant
- Achieved an **accuracy of 98.16%** which is higher than the traditional resnet model (97.5%)
- Created a new dataset of real images using **data augmentation** which significantly increased the accuracy

Earthquake Forecasting ***BITS Pilani***
Guide: Prof. Sumanta Pasari, Department of Mathematics *Aug-Dec'20*

- Analyzed **time series data of earthquakes** in five different regions to extract the seismicity information
- Implemented a neural network **model which forecasts earthquakes** using seismicity indicators in the regions
- Achieved an **accuracy of 90.4%** for forecasting the probability of an upcoming earthquake in the Himalayas

Facial Recognition Based Attendance System ***TNHSR***
Guide: Dr. Viduthalai, IT Expert *May-July'20*

- Developed a **facial-recognition based attendance system** to help curb the spread of COVID-19
- Used **openCV library** (**Haar Cascade Algorithm**) for facial recognition

Publications

- **Use of spatio-temporal features for earthquake forecasting of imbalanced data**.
  (*IEEE*) *International Conference on Intelligent Innovations in Engineering and Technology* (*ICIIET*). LINK
  Arnav Ahuja, Aaditya Sharma, Sumanta Pasari
- **Disease Identification in Tomato Leaf using pre-trained ResNet and Deformable Inception**.
  (*Springer*) *5th International Conference on Computational Intelligence in Data Science.* LINK
  Arnav Ahuja, Jennifer Ranjani, Aditya Tulsyan
- **Forecasting Earthquakes Using Neural Network Models**.
  (*Springer Nature*) *Disaster Management in Complex Himalayan Terrains - Natural Hazard Management, Methodologies and Policy Implications.* LINK
  Arnav Ahuja, Sumanta Pasari

Mentorship Experience

Teaching Assistant — *BITS F312 : Neural Networks & Fuzzy Logic*
Prof. Surekha Bhanot, BITS Pilani — *Aug-Dec'22*

- Guided a class of approximately 100 students and was responsible for their assignments
- Supervised multiple groups of 3-4 students in their projects

Technical Skills

Programming Languages	- C, C++, Java, Python, MATLAB, SQL, Shell Script
Data Science Libraries	- Boto3, PyTorch, TensorFlow, Keras, Pandas, Numpy, openCV
Machine Learning	- CNNs, RNNs, GRUs, LSTMs, Transformers, Reinforcement Learning
Platforms/Tools	- AWS (all services), Google Colab, Jupyter Notebook, MATLAB
